

The Perfect Predator

“Lead Poisoning... The Perfect Predator”

This video is a *must-watch* as it tells the stories of children who have been lead poisoned and how easily it can be prevented.

In a nutshell, the best course of action is to test your home...

- ✓ Testing (or screening) your home is a preventative action -
- ✓ And better to test BEFORE anyone has been poisoned.
- ✓ “Prevention is better than cure”, right?! 🔥

As Kelly J. Mikullitz, attorney, points out in the video, “testing properties prevents the exposure altogether... [lead poisoning is] 100% preventable...”

She says that in the jurisdictions which require screening of homes for lead, there’s been a huge reduction in the lead levels of children “because we’re not waiting until a child is poisoned to find the problems. This is a predator in your home...”
